## CAREER OBJECTIVE

Computer Science & Business Systems undergraduate (Expected 2027) with verified enterprise training across cloud infrastructure, network security, autonomous payment operations, and applied AI. Proven track record in building automated API test suites, simulating distributed transaction lifecycles, and contributing to open-source developer tooling. Seeking an engineering role to build resilient, high-throughput systems.

## EDUCATION

### Srinivas Institute of Technology (SIT)

Bachelor of Engineering in Computer Science & Business Systems (CGPA: 7.8 / 10.0)

Mangaluru, India

June 2027 (Expected)

### St. Anne's Composite PU College

Pre-University Course (PUC) – Science Stream (Percentage: 85.5%)

Mangaluru, India

March 2023

## TECHNICAL SKILLS

**Languages:** Java (Core Java, Multithreading, OOP), Python, JavaScript (ES6+), TypeScript, SQL, C/C++, Solidity

**Cloud & DevOps:** AWS (EC2, S3, RDS, IAM), HPE/Juniper Cloud, GCP, Firebase, Docker, Git, GitHub Actions, Vercel

**Web & Mobile:** React, Next.js, Node.js, Express.js, Flutter, Riverpod, Tailwind CSS, Streamlit, HTML5, REST APIs

**Testing & QA:** JUnit 5, TestNG, Postman/Newman (API Automation), Assertions, Boundary Testing, Concurrency, TDM

**Security & Protocols:** Zero-Trust (ZTNA), Cryptography (SHA-256), ZK-Proofs, Threat Modeling, OWASP Top 10

## ENTERPRISE EXPERIENCE & INTERNSHIPS

### GirlScript Summer of Code (GSSoC)

Open Source Software Engineering Contributor

Remote

May 2026 – Present

- Contributed bug fixes and feature enhancements to open-source developer and security tooling repositories via Git/GitHub.
- Configured GitHub Actions CI/CD pipelines for automated linting and unit testing, reducing review cycles by 25%.

### Fortinet

Network Security Engineering Intern

Remote

Oct 2025 – Dec 2025

- Completed 10-week enterprise security internship via AICTE, graduating with **Grade O (Outstanding, 90–100%)**.
- Configured stateful firewall policies, zero-trust network access (ZTNA), and simulated enterprise attack vectors.

### Palo Alto Networks

Cybersecurity Engineering Intern

Remote

Jan 2025 – Mar 2025

- Completed 10-week cybersecurity internship via AICTE, graduating with **Grade E (Excellent, 80–89%)**.
- Monitored network traffic telemetry, investigated simulated SOC alarms, and hardened virtual perimeter defenses.

### AWS Academy

Cloud Infrastructure Engineering Intern

Remote

Oct 2024 – Dec 2024

- Deployed resilient cloud architectures with AWS Core Services (EC2, S3, VPC, IAM); achieved **Grade A** evaluation.
- Engineered secure cloud VPC subnets, routing tables, and security group policies for scalable microservice hosting.

## FLAGSHIP PROJECTS

### RazorOps AI – Payment Operations & Liquidity Engine | React, JavaScript, Firebase

Sep 2026

- Architected cloud-native payment portal simulating transaction batch clearing, status lifecycles, and liquidity forecasting.
- Designed automated API assertions with Postman, validating JSON schemas, response codes, and idempotency headers.
- Implemented dynamic anomaly detection to trigger automated reconciliation, cutting manual auditing by 40%.

### VotX – Decentralized Identity & Voting System | Solidity, Polygon, ZK-Proofs

May 2026

- Deployed gas-optimized Solidity smart contracts on Polygon, reducing transaction execution costs by 18%.
- Implemented Zero-Knowledge proofs (ZK-proofs) for complete voter privacy, validated with 10,000+ simulated voters.

### Eco-Track Logistics – Predictive Routing Platform | Python, React, Gemini 2.5 Flash, CI/CD

March 2026

- Engineered predictive routing optimizer using Gemini 2.5 Flash, boosting supply chain disruption resilience by 25%.
- Streamed real-time IoT telemetry into Firebase Firestore for continuous shipment condition monitoring.
- Configured GitHub Actions CI/CD pipelines for automated unit testing, accelerating deployment frequency by 30%.

### Smart Farmer Connect – Agritech Analytics Platform | Next.js, Tailwind CSS, Vercel

March 2026

- Built agritech platform connecting farmers to crop analytics using Next.js and Tailwind CSS (+40% engagement).
- Configured automated continuous deployment via Vercel with Git integration, maintaining 100% platform uptime.

## LICENSES & CERTIFICATIONS

**Cloud & Systems:** JNCIA Cloud Associate (HPE, Sep 2026) | AWS Academy Cloud Architecting (60h, Credly) | NPTEL Cloud

**Cybersecurity:** Cryptography & Network Security (NPTEL IIT Kharagpur) | Fortinet Certified Associate (FCA) | Google Cyber

**Testing & AI:** IT Specialist AI & Analytics (Certiport) | Postman API Student Expert | Google Business Intelligence (2024)
